

AgEssentials™

C-01

Corn Seed Treatment

Promotes a healthier root system

Helps plants tolerate environmental stressors

NET CONTENTS: 0.90 LBS
PACKAGE TREATS 50 UNITS OR 4,000,000 SEEDS
BASED ON 80,000 SEEDS PER UNIT

An Increase in Plant Health is Essential.

With AgEssentials™ Corn Seed Treatment, you can ensure your crops get the extra protection they need to thrive, resulting in **higher yield, improved quality, and increased profitability.**

Better Corn. More Bushels. Higher ROI.

- **Increased Nutrient Uptake:** Helps plants mitigate stress throughout the growing season.
- **Stimulates Larger Root Mass:** Allows increased nutrient uptake and regulation of moisture.
- **Regulates Moisture:** Controls water uptake at crucial moments, like grainfill and balances moisture throughout the growing season.
- **Overall Healthier Plant:** Directly translates to a higher yielding corn crop.
- **Increased Yield:** 194 trials produced an average increase of 4.47 bushels per acre.*

C-01 CORN SEED TREATMENT

With a powerful combination of two live microbes, AgEssentials™ Corn Seed Treatment promotes water use efficiency, providing season long protection from stress. AgEssentials™ C-01 creates a larger, deeper root system, increasing water and nutrient uptake from emergence through pollination and grain fill. It helps your corn crop mitigate negative environmental conditions throughout the year, resulting in increased test weight and higher yield.

Soil Amending Ingredients (active ingredients)

Guaranteed Analysis

Bacillus simplex.....1.0 × 10⁷ CFU/g
Coniochaeta nivea.....1.0 × 10⁶ CFU/g

Application Rate for Seed Treatment

Crop	Use Rate (volumetric oz. / CWT)	Use Rate (mass oz. / CWT)
Corn	1.0	0.57

AgEssentials™ is a mixture of live microbes and an inert powder. To maintain performance of live microbes, the product must be applied and stored as recommended.
